Your numbers is suspended or restrict to dial.

You can use your phone at any area of the world (such as mainland China or abroad) not limited to Taiwan to call.

Please note: you must dial [112] by your phone, you can also dial [110] or [119] when your operators provide the service, but limited to Taiwan to apply.

Security Warning

To guarantee your cellular phone works properly, please follow the instructions in this manual to prevent any possible incidents or malfunctions.

RF Interference / Compatibility

If there is no proper mask design, or inadequately configured for RF compatibility, almost all electronic devices are susceptible to RF interference. These cases, your phone can cause interference.

Turn off when in hospital

Please follow the related limitations at the place where required turn off the phone .These places include hospitals or nursing homes and other healthcare facilities may be using equipment sensitive to external RF signals.

Aircraft safety rules

On the airplane or at the vicinity of the aircraft, turn off your phone and remove the battery. Using mobile phones in aircraft is illegal. It may be dangerous to the operation of the aircraft; it may destroy the mobile phone network. Offenders may be suspended or canceled cell phone service, and even be prosecuted or subject to double punishment.

Pacemakers

Pacemaker manufacturers will provide a minimum distance that the phone and a pacemaker to maintain. Pacemaker users should note:

When Phone is powered on, to keep the distance six inches (15 cm) or more between the phone and a pacemaker.

Do not put the phone in your breast pocket.

Please use the phone at the other side of pacemaker, in order to minimize the potential interference.

If you suspect that interference may occur, immediately turn off the phone.

Hearing Aids

Some phones may interfere with some hearing aids. If there is a kind of interference, please contact your hearing aid manufacturer to seek solutions.

Other medical devices

If you are using other personal medical devices, please consult the manufacturer of these devices; make sure they are adequately shielded from RF signals. You can also ask your doctor about relative information.

Road safety

Please observe all related local laws and regulations.

If you use your phone while driving, please observe the following provisions:

Concentrate on driving, pay attention to road conditions.

If driving conditions is bad, please park car on the roadside, and then make or receive calls.

Vehicles equipped with airbags

Airbags inflate with strong force, do not install or place the wireless communication device above the airbags or the areas where airbag can to reach, If in-vehicle wireless communication device is not installed correctly, once the airbag inflates, the can cause serious injury.

Turn off around exposure Area

Before enter into an area where prone explosion (such as gas stations and other places), turn off the phone. In these places, do not remove the phone; install the battery or charging the battery. Because in these potentially explosive environments, spark could cause an explosion or fire resulting in bodily injury or even death.

📖Note: The above areas could cause an explosion include: fueling areas (such as below decks on boats, fuel or chemical products transportation and storage equipment), where the air contains chemicals or particles (such as grain, dust, or metal powders). Potentially explosive atmosphere are often set a sign, but not all places have these signs.

Blast zone

To avoid explosion or even fire, please turn off your phone near the Electric detonator where explosion can occur. If there are other similar signs or instructions, please also observe.

Battery

Keep metal objects such as jewelry, keys, away so they don't come in

contact with the battery or its connectors as it may cause the battery to short circuit, overheat or any damage .

Please properly dispose the charged battery, Particular pay attention to the battery which placed in your pocket or bags which contain other metal objects. Please use original accessories and charging devices.

Electromagnetic radiation

This phone is designed and manufactured meets the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations (e.g.ICONRP international commission on non-ionizing radiation protection) through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

Using the Battery

■ Please only use original battery and use original accessories charge the battery to avoid serious damage to health and property.

■ Please turn off the phone before removing the battery.

■ Please carefully use the battery. If metal objects (coins, clips, etc.) contact with the battery's positive (+) and negative (-) pole, it may damage the battery and metal objects. Remove the battery from the phone to your bag should be careful note that don't have metal objects (such as keys) come in contact with the battery's positive and negative pole.

■ Do not dispose of the battery into a fire; do not leave the battery in high temperature areas.

3 Getting Started

3.1Inserting the SIM Card and the battery

The SIM card contains your subscription information ,it include your phone number, PIN (Personal Identification Number), PUK (PIN Unblocking Key) and IMSI (International Mobile Subscriber Identity) number and network messages, phonebook data and message data, etc.

📖Note：

- ■ This phone supports both 1.8V and 3V SIM cards.
- ■ Turn off the phone and after a few seconds, and then remove or insert the SIM card.
- ■ Be careful SIM card, friction or bend easily damaged SIM card.
- ■ Please note that the phone and its accessories SIM card and other small parts properly placed, and put in place out of the reach of children.

3.1.1 Inserting /remove the battery

The machine uses a lithium ion battery, please uses the original manufacturer or approved batteries, and take good care of the battery. Remove the battery cover, align the battery at a 45 degree angle to the battery contacts ,and then gently flat the battery to finish, batteries have a foolproof design, if the battery reverse will not be successfully , then please turn it over and re-placed.

To remove the battery, please allow the phone back to face you ,use the tip of the thumb lift the battery firmly, you can remove the battery

⚠Note: The phone is designed without the memory-capable battery, if you remove the battery, you must reset the time before using your phone.

3.1.2 Charging the battery

Please only use original accessories and charging devices that came with the phone .To charge the battery, plug in the connector at the left of your phone, and then plug the other end into an AC power socket. The battery symbol indicates the charging status. During charging, the charge indicators will scroll; when all the scroll bars are steady, the battery is fully charged. You can then disconnect the charger

⚠ Note：

（1）Make sure the battery is not removed.to avoid damage the phone or the charger

（2）Do not force plug in the connector to avoid damage the phone or the charger connector;

（3）In order to play the best battery performance, the first three recommended charging time is 6 to 8 hours, new battery charge and discharge times go through the process in order to achieve the best performance;

（4）The battery has not been used for a long time, it will automatically discharged, recharge it before use;

（5）Do not use any damaged or defective batteries and chargers;

（6）Battery is charged and discharged hundreds of times, it will eventually wear. If the battery operating time was significantly shorter than normal, replace the battery.

（7）The Charger if not in usage, do not plug into power socket for a long time, to avoid danger.

3.1.3 Insert the SIM card

Make sure that the clipped corner of the SIM card is facing the correct direction and the metallic contacts are facing downwards. Slide the SIM card into the card slot until it stops.

Note :

（1）Make sure that the phone is turned off. You need to remove the back cover of your phone before you can insert the SIM card.

（2）Do not bend SIM card especially the metal chips , should be carefully protected to avoid sticking dye dust and chemicals.

(3)Do not leave the SIM card in the place where the temperature may lower than -20℃or exceed 85°C

（4）place a SIM card out of the reach of small children.

（5）Prevent loss or damage data in the SIM card , keep the SIM card away from the electric, magnetic environment, install and remove the SIM card should be handled with care.

3.1.4 Password

To protect your phone against unauthorized use. The following password if required. Type the correct password and press the "OK" button.

If the input error, first press the "Clear" key to delete incorrect input, and then enter the correct number.

Configure the security Settings → Select "Settings" → Choose "Security Settings" → "Phone lock" / "Change Password" and other security settings.

■ Phone password

Main menu →Select "Settings"→ Schedule power on/off.

6.5.4 Call settings

■ Call Waiting: used to set whether to answer the other call when you have one active call.

■ Call divert: used to set the incoming call diverting.

Divert all voice calls: when set to on, need to enter the divert number for diverting all voice calls.

Divert if unreachable: when set to on, need to enter the divert number for diverting unreachable calls .

Divert if no answered: when set to on, need to enter the divert number for

diverting no answered calls.

Divert if busy: when set to on, need to enter the divert number for diverting busy calls.

Divert all data calls: when set to on, need to enter the divert number for diverting all data calls.

Cancel all: touch to cancel all calls diverts.

📖Note: The above four kinds of divert operations:

- active: Enter the divert number to open.

- deactive：Cancel the divert function.

- Query: Query a divert status by sending request to network .

Phone contact with the network, after a moment to respond and inform the query results.

■ Call Barring: This feature allows you to barring calls. Set this function, you need to enter call barring password provided by the operator. If the password is incorrect, an error message will appear. After the desired option is selected, continue to select turn On or Off this function, call barring password will be request, and then the phone will request Internet connection, after a short pause, the network will respond and inform the result of the operation.

1. Outgoing calls: set the type of barring outgoing calls.

2. Incoming call: set the type of barring incoming calls.

📖Note: The above two kinds of barring operations:

- active: Enter the barring number to open.

- deactive：Cancel this function.

- Query: Query a barring status by sending request to network.

Phone contact with the network, after a short pause, the network will respond and inform the query results.

■ Group List: select to set up group.

■ Blacklist: select to set to reject unknown calls, reject an incoming call of blacklist numbers.

- White List: You can set the white list mode, white list numbers.
- Auto redial: touch to set to on or off.
- Call Time reminder: touch to set to off, single or periodic.
- Auto quick end: You can turn on or off this function and can also set a deadline.
- Reject by SMS: touch to set to on or off.
- Call Link Notification: touch to set to on or off.
- Answer mode: you can select any key or headset mode to automatic response.
- Background sound: background sound when calling , playback set, the background sound list.

6.5.5 Security settings

SIM security

Main menu →Select "Settings" → select "Security settings" →"SIM security".

- SIM security

PIN lock.

Change PIN1 code.

Change PIN2 code.

Phone security

Main menu →Select "Settings"→ select "security settings" →"Phone security".

- Phone lock: you can set to on or off.
- Change password: touch to change the password.

  Note: The initial password is 0000.

Auto keypad lock

Select to turn off the Keypad lock or set the time(5s,10s,30s,1m and 5m) for auto keypad lock. If the time expires, the keypad will be locked automatically.

6.5.6 Restore factory settings

Main menu →Select "Settings"→ select "Restore factory settings"

This function allows you to reset the most of the phone setting to the original setting when it is produced. Enter the phone lock password and press left soft key to confirm.

📖Note: The initial password is 0000.

6.6 Organizer

6.6.1 Calculator

Main menu →Select "Organizer"→ select "Calculator"

■ Enter the first number: When the screen displays "0", enter the number (press "#" key to enter a decimal point; press the left soft key to enter a negative number).

■ Enter the operator: use navigation keys to select +, -, *, / operator;

■ Enter the second number.

■ Calculate: Press "ok" key to calculate.

■ Continue the calculation: if you use the existing results to continue calculate, directly enter the second number.

■ Clear: Press the "Clear" button. According to the input status to clear. If you have got the result, the screen display zero. If you are entering an operand or operator, only clear the current operand or operator.

■ Exit calculator: press the back key to exit calculator, if there is no back key, press clear key to progressively exit.

📖Note: This computer has limited accuracy, will produce rounding errors, especially not divisible.

6.6.2 Notes
From the main menu, select Organizer → Notes. Now, You can add To-do.
6.6.3 World clock
From the main menu, select Organizer → world clock. Now, You can Respectively set up the date and time for six groups of cities.
6.6.4 Tasks
From the main menu, select Organizer → Tasks.now, You can add Tasks.
6.6.5 Unit converter

From the main menu, select Organizer → Unit converter.

This feature helps you to convert either the weight or length to a different unit.

6.6.6 Currency converter

From the main menu, select Organizer →Currency converter. This feature applies simple currency converter function.

First, you should enter the rate, and then enter the local data.

Press the OK key, and the foreign data conversion will be shown automatically.

6.6.7 Stopwatch

This function is designed to store the timepiece, which is to start or stop for exact timing.

From the main menu select Organizer →Stopwatch. Select Typical stopwatch, You can choose different record methods (Split Timing, Lap Timing) and View records. Select nWay stopwatch. You can make four records.

6.7 Calendar

This feature allows you to keep track of your schedule and tasks saved in the calendar. You can also switch on the alarm with the task for reminding.

In Organizer menu, choose Calendar. Press the left soft key to access the following options:

- ■ View: View the custom events.
- ■ View all: View all events.
- ■ Add Event: Add a custom event.
- ■ Delete events: delete a custom event.
- ■ Jump to date: To view or edit a event for that day.
- ■ Jump to today: jump directly to today.
- ■ In month view: to view by month.
- ■ Lunar: can be set to on or off.

6.8 alarm

Select Main menu → Alarm.this menu provide an total of five customizable alarms.

📖Note: When an alarm ringing, if you choose sleep or do nothing to stop

ringing, the alarm will default to the user does not hear ringing, the alarm will ring again, Snooze time can be setting.

6.9 Bluetooth

Select Main menu→ Bluetooth you can access the following menu;

- Active Bluetooth: touch to turn on.
- My device: View already paired devices.
- Search for hands-free device: search around for hands-free.
- My Bluetooth name: iTree G588
- Advanced options:

  （一） Set sound route: select route through (Bluetooth headset) or through the phone's microphone and speaker.

  （二） Bluetooth device address: View device address.

📖Note:

1. When you active the Bluetooth feature and after pairing with a Bluetooth headset device, all of the audio output will route through Bluetooth headset output, please modify the settings.

2. Not all Bluetooth headsets are supported by this phone; any questions please contact the dealer.

3. The low-power radio-frequency devices satisfy this standard during product certification, without permission, company, firm or user is not allowed to change the frequency, increase the power or change the features and functions of the original design.

4 .low power radio-frequency devices shall not influence aircraft security and interfere legal communications; once interference phenomena are found, should stop using them immediately and improve to no interference before continuing to use.

7、Appendix

Appendix 1:Simple Troubleshooting

If the phone was not operating properly, first restore the factory settings, and refer to the following simple solution. If this does not solve the problem, please contact your dealer or service provider contact.

Simple Troubleshooting		
Common issue	Cause reason	Shooting way
Speaker issue	Phone does not ring	1、Check whether there is enveloped ring, remove the test again
		2、View whether to use mute mode.
Earpiece issue	Can not Hear the sound of caller voice or the sound is too small	1、Check whether there is enveloped ring, remove the test again
		2、Check the earpiece volume was set to 0, press the navigation keys to adjust the volume
Microphone issue	Can not hear the callers sound	1、Check whether there is enveloped Microphone port, remove the test again
		2、make sure whether press to mute during a call.
Vibration issue	No vibrating alert	1、View the profile settings for errors, user profiles->make sure the vibration is turned on.
Keyboard issue	No action	1、Check whether there is enveloped keyboard, remove the test again.
		2、Check whether the keys is stuck, click each key.

Cannot charge	charging no response	1、Make sure the charging accessory models are correct, and if there are problems, please replace the faulty parts.
		2、Check the connection between the phone and the charger.
Can not power on	Can not power on	1、check battery is inserted properly
		2、 charge battery
		3、Check the battery contacts are dirty, wipe with alcohol
		4、Battery life is more than eight months of use, if so we recommend to update battery
		5、Check the battery whether swelling
		6、make sure the power button location is correct
Display issue	Phone has a power-saving mode, it will quickly enter the dark screen, black	1、Please check the phone is in power-saving mode.
		2、Some mobile phone press the end power key will enter the power saving mode
Backlight issue	Backlight does not work	1、check to close the Backlight function, proposes to restore the factory settings and try again
Wrong SIM card	SIM card is unusable	1、Confirm SIM card is the Asia-Pacific's card? the Asia-Pacific's SIM card can only be used in the CDMA mobile phone can not be used in the GSM mobile phone.

		2、Make sure SIM card's insertion direction is right? (consult insert thr sim card sections in this manual for details about Insertion direction).
		3、check whether SIM is oxidized , morph and other circumstances,dirt on the sim card,wipe it with alcohol.
Wrong memory card	Memory card is unusable	1、Make sure the phone does not support hot swap function
		2、Formatting the memory card before use
		3、check wether the memory card is oxidized, morph and other circumstances, wipe dirt with alcohol
		4、Make sure Memory card's insertion direction is right?
Camera issue	Can not take an photo	Pleas make sure insert SD card .
Password	Phone Password	0000

Appendix 2: Mobile Info

Certification Number:	CCAE153G0020T1
Product Name / Model:	Handheld mobile phone(WCDMA/GSM/DCS/Bluetooth) / G588
Rated voltage / frequency :	5Vdc GSM850/900/1800/1900MHz ` WCDMA900/2100 MHz
Battery specifications :	3.7V , 1000mAh
charger :	Input AC : 100-220V , 50/60Hz , 150mA Output DC : 5 V , 1.1A
SAR values2.0W/Kg :	send testing value : 0.298 W/Kg
warning :	Reduce battery wave impact, Use Properly。
Made time/address :	2015 / china
Manufacturing (import agent) vendor name, and address customer service line :	Everwonder International CO., LTD. （02）2700-6338 9F, No. 168 Sec 4, Hsin-Yi Road, Taipei City, 106, Taiwan, R.O.C .

SAR certification information

Specific Absorption Rate, SAR (specific absorption rate) is to use the phone, the body absorbs radio frequency radiation (RF) unit of measure. SAR value is determined in the laboratory conditions, using a standard mobile phone operating posture in all tested frequency transmitter highest power, although the SAR value is declared maximum power measured, but the use of mobile phones, the actual SAR value is much below the maximum. Generally the closer the base station, mobile phone transmitter power is lower.

※The SAR limit applied to mobile phones is of 2, 0 W/kg. send testing value 0.298 W / Kg.

※ reduce electromagnetic effects, please properly use.

※ According Low Power Radio Waves Radiated management approach:

Article 12:The low-power radio-frequency devices satisfy this standard during product certification, without permission, company, firm or user is not allowed to change the frequency, increase the power or change the features and functions of the original design.

Article 14:the low power radio-frequency devices shall not influence aircraft security and interfere legal communications; once interference phenomena are found, should stop using them immediately and improve to no interference before continuing to use.

The above legal communications means in compliance with telecommunications radio operation. Low-power radio communications should satisfy legal communications and must accept any interference received from electrical equipment such as industrial, scientific and medical radio wave radiated.
